

AI/ML Engineer

Location: Bangalore

Experience: 0-2 Years

Job Description:

We are looking for an AI/ML Engineer to join our team. The candidate should have a strong foundation in Machine Learning, Python, and Data Analysis. The ideal candidate should be capable of building machine learning models, performing data preprocessing, and deploying AI applications.

Responsibilities:

- Develop and train Machine Learning models.
- Perform data cleaning and preprocessing.
- Analyze datasets using Pandas and NumPy.
- Build REST APIs using Flask or FastAPI.
- Deploy AI applications using Streamlit.
- Collaborate using Git.
- Work with SQL databases.
- Participate in model evaluation and optimization.

Required Skills:

- Python
- SQL
- Machine Learning
- Pandas
- NumPy
- Scikit-learn
- Streamlit

- Git

Preferred Skills:

- Deep Learning
- TensorFlow
- PyTorch
- Docker
- AWS
- Linux
- FastAPI
- Flask
- OpenCV
- LangChain
- LangGraph
- HuggingFace

Qualifications:

- Bachelor's degree in Computer Science, Artificial Intelligence, Machine Learning, or related field.

Good to Have:

- Internship in AI/ML or Data Science.
- Experience with deployment projects.
- Knowledge of LLMs and Generative AI.
- Good communication and problem-solving skills.
