PROFESSIONAL SUMMARY

AI & Machine Learning graduate with hands-on experience building end-to-end ML applications using Python, Scikit-learn, and Streamlit. Skilled in data preprocessing, model evaluation, deployment, and solving real-world business problems.

TECHNICAL SKILLS

Languages: Python, SQL

Machine Learning: Scikit-learn, Logistic Regression, Random Forest, GridSearchCV, EDA

Libraries: Pandas, NumPy

Deployment: Streamlit, Plotly

Tools: Git, GitHub, Power BI, Excel

PROJECTS

Customer Retention Decision Support System (CRDSS)

- Developed an end-to-end telecom churn prediction application using Scikit-learn Pipeline and ColumnTransformer.
- Compared six ML algorithms and selected Logistic Regression using GridSearchCV with 5-fold cross-validation (~80.5% accuracy).
- Built a Streamlit dashboard supporting single/bulk prediction, churn probability, downloadable reports, and business recommendations.

HR Attrition Prediction

- Developed a Random Forest model to predict employee attrition using Job Satisfaction, Work-Life Balance, Overtime, Monthly Income, and Years at Company.
- Performed preprocessing and selected Random Forest after comparing multiple ML algorithms.
- Analyzed employee data to support employee retention decisions.

INTERNSHIP EXPERIENCE

Data Science Intern | Take It Smart (OPC) Pvt. Ltd. | Jan 2026 – May 2026

- Completed training in Python, SQL, ML, Deep Learning, NLP, and Power BI.
- Worked on preprocessing, EDA, feature engineering, predictive modeling, and ML projects.
- Built and evaluated ML workflows using industry-standard tools.

EDUCATION

B.E. Artificial Intelligence & Machine Learning

Coorg Institute of Technology | CGPA: 7.98 | 2022–2026
